Do I need a 5kw inverter?

For both the 8kW and 10kW options you probably have to double up on the battery size of the 5kW inverter. I am under the impression that the 5kW inverters run more quietly and it would allow you to build in phases. This is incorrect... You do not have to have 5kW of battery power available just because you have a 5kW inverter.

Why do I need A 10kw inverter?

If you have 10kW inverter, it's because you will need to draw 10kW of power at some point and if there is loadshedding and no sun, the batteries should be able to provide for that 10kW draw. On 2022/08/03 at 8:28 PM, WAP said: What happened to your inverter, Sunsynk is assuming that you needed repairs? My electrician messed up!

Does a 10kW inverter need a battery?

On 2022/08/04 at 3:00 AM, PowerUser said: This is true but there is no point in such setup. If you have 10kW inverter, it's because you will need to draw 10kW of power at some point and if there is loadshedding and no sun, the batteries should be able to provide for that 10kW draw.
