What does 12V/24V mean on a solar panel?

The 12V/24V in product titles (ex. 100W 12V Monocrystalline Solar panel) does not refer to the actual voltage (Voc or Vmp) of the solar panels, but rather to the voltage of the solar system or energy storage system to which the panel is best suited. Why is it different from the value on the label/specification sheet of the solar panel?
