12V off-grid systems are a popular choice among the RV and camper community due to their simplicity, efficiency, and suitability for smaller loads, such as lighting, small appliances, and charging devices. These systems are also scalable, which means they can be adjusted to meet individual needs.

3 disadvantages of a 12V LED system 1. Low electrical efficiency. With 12V systems, the lower voltage means more current must be supplied to compensate. For example, a 120V LED system will pull 1 Amp in a 120 Watt system, while a 12V LED system will need to pull 10 Amps to power the same 120 Watt system. Why does the amperage matter?

Here you will find our range Off-Grid Solar Kits for 12 volt battery systems, these kits are all supplied with 12V-DC batteries. Typical applications include Log Cabins, Workshops/Garages, Garden Offices, Static Caravans ...

Installing a 12v solar panel system is rather simple if you have the step-by-step guide.
