What is the size of a 21700 battery?

A "21700 battery" is short-hand for a rechargeable, lithium ion battery that is 21 mm in diameter and 70 mm long. Much like an 18650 cell, these lithium ion batteries power some of the brightest, longest running flashlights and are rechargeable to boot!

Do you need to modify your device for a 21700 battery?

While it is physically possible to replace an 18650 with a 21700, it may require modifications to the device's battery compartment and charging system. The 21700 offers higher capacity and energy density, providing longer runtimes.

What is the voltage of a 21700 cell?

A 21700 battery, or a "21700 cell", has a voltage of 3.7v. It is a high capacity lithium ion rechargeable battery with between 3000 mAh and 5100 mAh (mili-amp-hours).

Is it a good idea to buy a 21700 battery?

When buying 21700 batteries, it's a good idea to buy just one initially to ensure the size is correct. Some cheaper manufacturers may not fully adhere to the 21mm x 70mm specification, and even reputable manufacturers' batteries might vary in size. Be cautious and suspicious of offers that seem too good to be true.

Where can I purchase a 21700 rechargeable battery?

You can buy reliable 21700 rechargeable batteries from reputable sources such as Amazon, Battery Junction, or directly from manufacturers like Nitecore. Some good brands include Orbtronic, Samsung, LG, Panasonic, and Nitecore.

Can you use 18650 batteries in a 21700 flashlight?

If you want to still use your 18650 batteries, look for 21700 battery flashlights that include an 18650 battery magazine. This special adapter will make up for the extra length and diameter and allow you to use either size battery in your flashlight interchangeably.
