

21700 battery 15c high rate battery cell

What are 21700 batteries?

21700 batteries are lithium rechargeable batteries that come in various versions with differences in battery capacity, pulse rate, drain current, charging current, and battery terminals, among other things.

What is the voltage of a 21700 cell?

A 21700 battery, or a "21700 cell", has a voltage of 3.7v. It is a high capacity lithium ion rechargeable battery with between 3000 mAh and 5100 mAh (mili-amp-hours).

Are 21700 battery cells a good choice?

In the past two years, 21700 battery cells have gained widespread use in the small power market due to their higher energy density and overall cost advantages compared to traditional 18650 cells.

Which 21700 battery has the highest capacity?

Presently, the highest capacity available in the market is the 21700-5.3Ah. The production of the BAK 21700-5.5Ah cell signifies a new peak in domestically produced 21700 cell capacities. BAK Battery has consistently maintained a proactive stance and technological edge in the research and production of 21700 cells.

What is the production capacity of 21700 battery cells?

This is especially evident in applications such as two-wheeled transportation, smart homes, power tools, consumer electronics, and portable energy storage. The capacity of 21700 battery cells has continuously broken through as their application scope expands. Currently, the highest production capacity available in the market is 21700-5.3Ah.

What is an unprotected 21700 battery?

Unprotected 21700 Batteries: Designed for battery packs or high-performance applications where external battery management systems (BMS) handle protection. 21700 batteries are becoming the industry standard for devices requiring longer runtime and more power. Some common applications include:

They continuously break through the capacity ceiling of 21700 battery cells, successively releasing and mass-producing 21700-5.0Ah and 21700-5.3Ah battery cell products. Through continuous innovative R& D in the four key materials and structural design of the anode, cathode, separator, and electrolyte, BAK's 21700 cylindrical battery performance ...

The BAK 21700 5000mAh 15A Battery (N21700CG) is currently in stock and available at 18650 battery store. Bulk discounts are available. All items ship from our Atlanta, GA warehouse for quick delivery within the USA. Grade A, matching voltage, great ...

What are 21700 Batteries? The 21700 battery is a rechargeable lithium-ion cylindrical cell defined by its 21mm x 70mm dimensions. The 21700 is a fast-growing battery size as modern flashlights and other high-drain devices require increased battery capacities for extended runtimes.

It boasts six major characteristics: high energy density, long cycle life, high rate capability, fast charging, strong temperature adaptability, and high safety. Deeply rooted in high-nickel cylindrical cells, BAK Battery pursues ...
