

380wh portable power bank

What is a portable power bank?

Conveniently compact, a portable power bank will fit easily in your pocket or backpack, and will allow you to charge your phones and smaller gadgets on the go. Perfect for staying connected while camping, many KickAss portable power banks allow you to charge up to five devices at once.

What is a kickass power bank?

From camping trips to remote work setups and emergency preparedness, our range of power stations, power packs, and power banks deliver reliable, versatile, and convenient energy. Compact and portable, KickAss power banks are perfect for quick recharges on the go.

What is a kickcharge 380wh portable power pack?

The KickCharge 380Wh Portable Power Pack is your go-to for camping, road trips, or emergencies. Compact yet powerful, it delivers reliable energy wherever you are. Built for off-grid living, it offers efficient, safe, and convenient power in a durable, easy-to-carry design. This product is covered by a 2 Year Limited Warranty.

What is a kickcharge power bank?

From compact power banks to high-capacity power stations, the KickCharge Series keeps your gear running no matter where you set up camp. Built for off-grid reliability and everyday convenience, these portable power solutions are your go-to backup for phones, fridges, tools, lights, and more -- whether you're in the bush or on the move.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running on empty.

How many devices can a kickass power bank charge?

Perfect for staying connected while camping, many KickAss portable power banks allow you to charge up to five devices at once. Available in a variety of colours and capacities, they're the ideal travel companion.

The terms "power bank" and "portable charger" are often used interchangeably, referring to devices that store and supply electrical energy for mobile devices. However, some may differentiate by suggesting that a power bank is a standalone device with built-in batteries, while a portable charger could refer to a device that relies on external ...

Is your phone, tablet, or laptop typically in the battery red zone before the day's end? These portable chargers and power banks give you the most boost when you're out of juice.

Hi, I am trying to power a LCD screen using a portable power bank and would like to know what size battery I need to power if for 6 hours. The screen runs at 130mA at 12V apparently, so 1,560 mW. This equates to 1.56 Wh So, $1.56\text{Wh} \times 12\text{V}/1000 = 130 \text{mAh per hour}$ => $130 * 6 = 780 \text{mAh}$. This doesn't seem right. Can any help please? Reply
