

Is there solar energy in Albania?

There is a large potential of solar energy in Albania. Solar radiation is 1.7-2 times higher than in Germany. About 99.5% of energy in Albania is produced by hydropower plants (in summer there is not such rainfall). Many small power plants can not operate during the summer months, as water is needed for agriculture.

How much does a photovoltaic system cost in Albania?

More than 60 individual photovoltaic systems have been installed in rural areas of Albania. 5-7 LED lamps 4 Watt 12 Volt = brighter than a normal 40 Watt lamp. The price of such a set is 300 EURO (50 Watt system) and 500 EURO 100 Watt system. An eco-tourist complex, with 10 cabins, only with solar energy, for 5 years does not pay electricity bills.

How can solar energy improve the quality of life in Albania?

In these remote areas, solar energy is a real opportunity to improve the quality of life. More than 60 individual photovoltaic systems have been installed in rural areas of Albania. 5-7 LED lamps 4 Watt 12 Volt = brighter than a normal 40 Watt lamp. The price of such a set is 300 EURO (50 Watt system) and 500 EURO 100 Watt system.

Do people in Albania use a lot of energy?

Households as well as offices use a lot of energy for air conditioners and consume electric hot water heaters. Although Albania has inherited a central system of energy distribution throughout the country, it has happened that in many poor villages, especially in the mountainous areas of Albania, this access has been denied to the inhabitants.

What is the energy demand of the tourism industry in Albania?

The energy demand of the tourism industry focuses mainly on the period June-October. In these 5 months are about 80% of the accommodation about 3/4 of annual energy needs. Albanian agriculture in summer has high energy consumption, which is necessary to irrigate their fields. This is mainly done by electric pumps or pumps with fuel generators.

How does Albanian agriculture use a lot of energy?

Albanian agriculture in summer has high energy consumption, which is necessary to irrigate their fields. This is mainly done by electric pumps or pumps with fuel generators. Households as well as offices use a lot of energy for air conditioners and consume electric hot water heaters.
