

Are there any outdoor power suppliers in Tunisia

Who produces the most electricity in Tunisia?

While STEG controls the vast majority (91.7%) of installed generating capacity and generates 84% of the country's electricity, there is one independent power producer, Carthage Power Company, operating in Tunisia. Carthage Power Company owns and operates a 471-MW combined cycle power plant.

How much power will Tunisia's new power line supply?

The line will have an HVDC transmission capacity of 2,000 MW and is expected to supply power to 2 million homes in Europe. The 661-km long project is expected to be complete in 2032, though the website does not specify the quantity of energy, if any, that will be allocated for Tunisian residents.

Does Tunisia have solar power?

Original licensing: 2020 The World Bank, Source: Global Solar Atlas 2.0, Solar resource data: Solargis. Tunisia has significant solar potential given the country's high irradiance, ranging from 1800 kWh/m² per year in the North to 2600 kWh/m² per year in the South. This equals approximately 1,980 sunshine hours per year.

Why does Tunisia need more electricity?

As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and increasing desalination needs.

How much energy does Tunisia generate?

Source: IRENA. According to Global Energy Monitor, Tunisia has a generating capacity of 6,079 MW total, comprised of oil and natural gas (5,771 MW), solar (55 MW), and onshore wind (253 MW). In 2022, Tunisia increased its renewable energy target to 35% of total energy generation by 2030.

How many kV power lines are there in Tunisia?

The project will consist of 660 km of 525-kV ACDC overhead lines in Tunisia, 661 km of 525-kV DC submarine cables, and 7 km of 525-kV DC and 400-kV underground cables, terminating at an existing high-voltage substation. Tunisia's power sector is well-developed, with 99.8% of its population having access to the national electric grid.
