This domestic consumption of electricity is measured in kilowatts/hour, since power is measured in watts and depends on the two values mentioned above - voltage and current. To make it easier to understand, let's consider this situation: if you turn on a 300-watt light bulb in your house at 110 V, a current of 2.72 amps will flow through ...

Short answer: most likely you'll be able to use your devices in most places, but, just in case, bring a simple US-Europe power adapter like this: Long answer: Brazil had always used both US and European power plug standards, but since 2011 ISO 60906-1 is the only acceptable one, i.e. now it's not allowed to sell the old plugs/sockets in stores. So you still see a lot of ...
