For tough industrial situations, the PCS100 UPS-I and PowerLine DPA for example ensure protection from power quality events, delivering clean, continuous power supply to your process, even under the most extreme environmental conditions.

Uninterruptible Power Supply Systems (UPS) are redundant power supply devices that store power in a battery to which electronic equipment can be connected. They act as a firewall between the mains supply and the equipment. During an outage, overvoltage, voltage dip, etc., they provide continuity in the alternating current supply by transforming the direct current from ...
