

Cameroon Douala LNG peaking energy storage project

Could a floating liquefied natural gas terminal be built in Cameroon?

The company Golar LNG (owned by Norwegian shipping magnate John Fredriksen) has proposed creating a floating liquefied natural gas (FLNG) terminal off the coast of Kribi, in the Océan Department of Cameroon. The terminal would have a capacity of 1.2 million tons per year (mtpa), or 0.17 billion cubic feet per day (bcfd).

What happened to Golar LNG in Cameroon?

However, in June of 2018, Golar LNG said it had started commercial operations at the FLNG project in Cameroon, \$70 million under budget. In February 2023, New Fortress Energy agreed to sell its entire interest in the project to Golar LNG.

Where is FLNG terminal in Cameroon?

Cameroon FLNG Terminal is an operating floating LNG terminal in Océan Department, Cameroon. Your browser is not compatible with Google Maps v3. Owner: Golar LNG Limited (89%); Keppel Corporation Ltd (10%); Black & Veatch Holding Company (1%) Note: mtpa = million tonnes per year; bcfd = billion cubic feet per day

What is the capacity of Golar LNG terminal?

The terminal would have a capacity of 1.2 million tons per year (mtpa), or 0.17 billion cubic feet per day (bcfd). In September 2015, Golar LNG signed an agreement with British/French oil & gas exploration company Perenco, Cameroonian state-owned oil & gas company Société Nationale des Hydrocarbures (SNH), and Russian giant Gazprom.

In May 2018, Golar LNG achieved First LNG from the Cameroon floating LNG project (GoFLNG), with feedstock from Perenco's Ebome Marine fields in the southern part of ...

Clarke Energy is the authorised distributor and service partner for Jenbacher gas engines in Cameroon. Clarke Energy is committed to delivering high-quality installations and to providing reliable, accountable, long term maintenance support for your generation equipment.

Douala, Cameroon, May 2021, Clarke Energy and INNIO Jenbacher are delighted to announce the successful commissioning of a high-efficiency INNIO Jenbacher gas engine to power a new Pasta factory in Cameroon. The combined heat and power (CHP) project will be executed in two phases. project will be executed in two phases.

Cameroon officially became an LNG producer on March 12, 2018. On that day, a consortium comprising SNH, Golar LNG, a builder of floating LNG liquefaction platforms, and Perenco launched the Hilli Episeyo, a
