

# Container power outage dedicated generator

What is a containerised generator?

Containerised generators offer increased levels of weather protection for the generator unit in harsh environments. For example they're ideal for exposed locations, marine environment, oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

Can a containerised generator power a construction site?

At Dale, we have a wide range of containerised generator units that can power everything from a construction site to a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

What type of generator is used for refrigerated shipping containers?

o Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

Do you need a commercial generator for a shipping container?

When your company's future, your patients' wellbeing, and the perishable goods in your inventory are all on the line then you can't risk a power outage. A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick?

Can a diesel generator be used as a standby generator?

Excess usage: Most diesel generators are designed to provide backup power. Should a standby generator be used for prime power, care should be taken to ensure the generator is inspected frequently and only used for as long as it is required.
