Through conversion on the input DC power, the sinusoidal inverter offers users stable and undistorted AC power. In case of a power failure in business places, it offers key devices the power of flexible output voltage and frequency. With a static transformer switch(STS), the inverter can offer a reliable and cost-effective online or standby Uninterrupted Power Supply(UPS). ...

An inverter converts a 48 Volt DC voltage (battery) into an AC voltage (230V-50Hz). Stable 230V with pure sine wave. The standard output voltage is 230 Volt, 50Hz with a pure sine wave. This means that this inverter supplies the same type of voltage as the wall socket. This allows any electrical device to work on it.
