What is a portable rechargeable battery pack?

A portable rechargeable battery pack consists of a 60 watt hour lithium ion battery assembly and two DC/DC converters. The first DC converter allows the pack to be charged with a wide range of voltage inputs, while the second allows the pack to deliver a user settable voltage to run equipment requiring 5volts to 19+volts.

What is a battery pack?

A battery pack is a set of any number of battery cells connected and bound together to form a single unit with a specific configuration and dimensions. They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or power density.

How many volts can a battery pack charge?

The battery pack's charger section has a DC/DC converter with a wide input range of 5 to 24 volts. This means it can be charged from various sources with input voltages within this range.
