

# Energy storage power procurement in Democratic Republic of Congo

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

What is the main priority for the Democratic Republic of Congo's power sector?

The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of which 1.6 million have access to electricity. This makes it the third largest population in the world without access to electricity.

Why does DRC have a high electricity demand?

All segments of electricity demand are severely constrained by supply. Most demand in the residential sector is unmet, partly because DRC has one of the largest deficits in electricity access in the world and high geographical disparities (see chapter 2 for information about access). So is industrial demand.

What solar projects are being built in the DRC?

The main existing solar project in the DRC is a 1MW solar mini-grid with 3MWh of battery storage capacity built by Enerdeal and Congo Energy in the city of Manono, to supply the local population and SMEs. Enerkac has also developed a 1MW hybrid plant powering SNEL's Kananga mini-grid in Kasa#239; Central (non operational in 2019).

How much would it cost to get grid electricity in DRC?

Providing all households of the 26 provincial capitals of DRC access to grid electricity through a mix of mid-sized hydro and solar power plants would cost approximately USD 10.5 billion in CAPEX. This would raise the access rate to about a third of the population, at a cost equivalent to 30% of GDP.

CENTRALIZED ELECTRIFICATION PLANNING HAS FAILED TO INCREASE ACCESS ACROSS THE TERRITORY AND THE POPULATION. PARAMETERS OF A LEAST ...

Regulation, Democratic Republic of the Congo, Renewable Energy, I. INTRODUCTION To ensure access to electricity to its population, the Democratic Republic of the Congo (DRC) has liberalized the electricity sector by promulgating law No. 14/011 on the electricity sector since June 17th, 2014 [1][2]. This law aims to

# Energy storage power procurement in Democratic Republic of Congo

Democratic Republic of the Congo General Procurement Notice - A General Procurement Notice (GPN) is a public announcement by Democratic Republic of the Congo about upcoming procurement opportunities for goods, services, or works, inviting interested suppliers to express their interest and prepare for further bidding processes.

The Democratic Republic of Congo has huge hydropower potential while also dealing with extreme energy poverty. Foreign investors are currently partially lifting constraints on the country's hydropower capacity, which is bringing down the costs of power.

The Democratic Republic of Congo is well endowed with forest area and carbon stocks in forest biomass represent the second largest in the tropical world. Crude Oil production is about 1,074 ktoe as mentioned in the AFREC's 2020 energy balance. There is no oil refinery in the country and as a result, all refined products including jet fuel and gasoline have to be imported.
