

Europe's new EK outdoor power supply

What is the new EU Regulation on external power supplies?

A new EU Regulation on external power supplies aimed at making a range of household appliances more energy efficient - from laptops to electric toothbrushes - enters into force as of 1 April 2020 within the context of EU ecodesign measures.

What is the European power supplies Manufacturers' Association (UKEiG)?

The European Power Supplies Manufacturers' Association UKEiG was formed in 1995 to represent the specialist needs of the power supply industry in Europe. The association currently has around 25 members from ten countries, employing over 8,000 people and with combined global revenues exceeding 5 billion Euros. Our mission statement:

What are external power supplies?

External power supplies are power adaptors used to convert electricity from household power mains into lower voltages, and are very common in European households, with an average of ten per household and more than 2 billion in total in the EU.

Does Europe have enough energy to power itself through winter?

While it's true to say that each country within Europe has a unique profile in terms of reliance across the energy-mix, and different levels of energy supply resilience, Europe as a whole faces a serious challenge: to ensure it can guarantee sufficient levels of energy to power itself through this coming winter.

How will the new energy rules affect European consumers?

As a result, European consumers will be able to save on their household bills, help reach significant EU-wide energy savings and reduce emissions. The new rules will make the external power supplies more efficient, aligning them to the highest standards worldwide.

Are power outages the next threat for Europe?

Just last month, news corporation, Bloomberg Europe, reported that power outages are 'the next threat for the continent'. Countries across the region are already expressing grave concerns over their gas supply reserves for the coming months. France's Prime Minister is warning of potential power cuts in homes across the country this winter.

A resilient EU energy system ensures secure supplies at any time, even during human-made accidents, natural disasters or other disruptions. ... Over a third of Europe's renewable electricity comes from wind power. Watch ...

After recent troubles, EK is certainly not going anywhere and it came to the Computex 2024 show in force, showing off several new products, including the whole new line of liquid cooling products, the EK Nexe. The
