Over the past two years, we've tested 62 different outdoor lights (you read that right) including solar pathway, smart, spotlights, lanterns, wall-mounted, and string lights. We became solar light experts, if we do say so ourselves. ...

But the power station also uses some of that stored energy to power itself. I tested 9 power stations with the latest LiFePo4 battery chemistry on both a low draw (34 watts) and a high draw (380 watts) to see which was the most efficient at converting stored power to usable power. I also evaluated portability and ease of use.
