

# Germany Hamburg lithium battery pack charging 58v

How does AEG 58v battery pack work?

When the battery pack AEG 58V lithium-ion batteries are designed with features that protect cools down to approximately 45 °C, the charger automatically begins the lithium-ion cells and maximise battery life. If the tool stops during fast charge mode. AEG battery packs have been designed to provide maximum trouble-free life.

What does a 58v battery charge indicator mean?

As the voltage approaches the 58V limit, the current drops off and the charge indicator on the battery indicates a full charge. The circuit board in the charger is a rather complicated affair that has white silicone globs on many of the components, making it near impossible to troubleshoot.

How many volts does a 58 volt battery have?

(edit) Details about the battery, its protection circuit, and how to reset it: He said the protection circuit does not have balancing. The circuit board has pads and tracks for the resistors and transistors, but they are not populated. There are 14 cells in series, so 58 V is 4.14 V per cell.

How do I know if my AEG 58v battery pack is good?

If liquid manual provided with the product. See page 7. red LED flashes and the green LED turns off. When the battery pack AEG 58V lithium-ion batteries are designed with features that protect cools down to approximately 45 °C, the charger automatically begins the lithium-ion cells and maximise battery life.

Can liquid be ejected from the a58bat14u battery?

Page 3 The A58BAT14U and A58BAT18U battery Under abusive conditions, liquid may be ejected from the battery; packs are for AEG 58V cordless products only. Refer to the operator's avoid contact. If contact accidentally occurs, flush with water. If liquid manual provided with the product. See page 7. red LED flashes and the green LED turns off.
