

What is the cost of a power adapter in Iceland?

Here's our recommended power adapters for people from the United States or Canada who are visiting Iceland: Ceptics 3-pack type E/F adapter. That 3 pack costs about \$10.

What type of power outlet is used in Iceland?

The power outlets used in Iceland are Type F. This type of outlet is recessed, meaning the faceplate of the outlet is deeper in the wall. Type F outlets are round with two small holes that fit a Type F electrical plug (also known as a Schuko plug). The Type F plug fits into the outlet and has two 4.8mm round pins spaced 19 mm apart.

What type of plugs does Iceland use?

Iceland uses the same plugs as Europe. The electricity plug standard in Iceland includes two types of sockets: Type C (two round prongs) and Type F (two clips on the side). The electricity in Iceland operates at 230 volts.

Do I need an adapter in Iceland?

Do not plug it into an adapter while in Iceland and send it 220 Volts. You will need a converter that lowers the voltage. So now you know whether you will need just an adapter, or a converter too. Adapters are very cheap. Here's a set of 3 at Amazon that we used in Iceland, and that we recommend. Be sure to select Type E/F!

How much power do I need in Iceland?

Power in the US is about 120V, and in Iceland it is about 220V. Both of those fit nicely in the range above, and so we can use this device in Iceland without converting the power to a lower voltage. You'd just need a simple adapter to change the shape of the plugs. But, PLEASE check your device.

What is the voltage of electricity in Iceland?

The electricity in Iceland operates at 230 volts. It can be really confusing to know the difference between an adapter and a converter because people often use these terms interchangeably - including myself. Type C: There are only two round prongs Type F: This one has two clips on the side.

In 2015, the total electricity consumption in Iceland was 18,798 GWh. Renewable energy provided almost 100% of electricity production, with about 73% coming from hydropower and 27% from geothermal power.
