

# Is it good to install solar photovoltaic panels on the roof

Should I install photovoltaic panels on my roof?

Solar power has continued to grow in popularity and drop in cost, meaning many of us are weighing up the pros and cons of installing photovoltaic (PV) panels on our roofs. The truth is, the answer to this question comes entirely down to your unique requirements.

Can a roofer install solar panels?

There are a lot of companies that can replace your roof and install your solar panels, but not all do. If your roofer does not offer solar services, it's very likely they have a trusted partner or can recommend someone in the area they know will be able to help, though.

Can you replace a roof with solar panels?

Simply put, you can't replace a roof while it has solar panels on it. So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue.

Do roof-mounted solar panels need a new roof?

So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue. If both are ready to be replaced at the same time, it might even be convenient.

Do solar panels need a slanted roof?

You have to position solar panels properly to achieve the highest energy production. The optimal orientation and angle usually require a slanted roof that faces the sun. Some roofs have a unique shape that might not accommodate rigid, flat panels. For those homes, flexible solar panels can be a good workaround.

Can a wooden roof be used for solar panels?

Wooden roof types can include shingles at an angle or may be completely flat, so the specifics will be dependent on the way the roof is structured. In any case, a wooden roof is not viable for solar panels because of fire safety concerns. Therefore, wood is not the best material for solar panels.

Also See: [3 Leading Types Of Solar PV System. Which is the Best Roof Direction for Solar Panels to Get Best Orientation and Angle?](#) Typically, a 30° angle is considered best for solar panels. But this slightly varies ...
