How do I avoid overloading my power supply?

To avoid an overload of power, only connect a device with a power draw within the cord's capacity. It's also best to use only one extension cord per power supply versus a multi-plug extension cord.

Can you use a power strip outside?

It's generally not recommended to use a power strip outdoors, especially in wet or humid conditions. Power strips are designed for indoor use and can be damaged by exposure to water, sunlight, and extreme temperatures. When used outdoors, power strips can become a fire hazard or cause electrical shock.

Are power strips safe?

The answer lies in their power requirements and safety features. Power strips are designed to provide a convenient and organized way to plug in multiple devices, but they are not designed to handle high-power devices. Plugging high-power devices into a power strip can lead to overheating, electrical shock, and even a fire.

Why should you use an outdoor-only extension cord outside?

Another reason why it's important to use an outdoor-only extension cord outside is because many are designed to withstand various weather conditions like moisture, rain, snow, freezing temperatures and sunlight. These cords have added shielding layers to insulate and protect the fragile wires inside.

How do I maintain portable and transportable electrical equipment?

The HSE booklet 'Maintaining portable and transportable electrical equipment' will help you do this. Check that the equipment is suitable for the electrical supply with which it is going to be used, and the electrical supply is safe. It is often beneficial to use a Residual Current Device (RCD) between the electrical supply and the equipment.

How do I protect my outdoor extension cord?

Another way to protect your outdoor extension cord is to ensure the outlet outside your home is safe to use. We highly recommend using a Ground Fault Circuit Interrupter (GFCI) outlet for outdoor use. These safety outlets provide an extra layer of protection against electrical shocks and short circuits, especially in damp or wet areas.
