Do smart devices need an uninterruptible power supply (UPS)?

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in.

Do you need an uninterruptible power supply?

To protect your likely expensive investment, an uninterruptible power supply is integral. This applies especially to areas that suffer from frequent power outages, particularly rural areas, extreme climates, or places with bad power grids. In order to buy the right UPS, however, you'll need to make sure that some basic requirements are met.

What is the best uninterruptible power supply for mid-range PCs?

Though the lack of a USB port limits the versatility of this model, we still highly recommend the Back-UPS Pro as the best uninterruptible power supply for mid-range PCs! If you need an uninterruptible power supply on a budget, in the event of an outage, then Tripp Lite's AVR750U is an affordable must-buy.

What are the best UPS devices?

So what follows is a considered and varied list of best UPS devices, which should sort you out in a pinch. If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you.
