

# Italian Energy Storage Project Grid Connection Regulations

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

Does Italy need an energy storage system?

On 21 January 2020, the Ministry of Economic Development published the Integrated National Energy and Climate Plan, setting targets for energy efficiency, development of renewable sources, and CO2 emissions reduction. These targets cannot be achieved without implementing an efficient energy storage system in Italy.

Is there a market for electricity storage in Italy?

The market for electricity storage in Italy is growing very fast. However, the legislative framework is fragmented and does not fully cover all the main features of this market. Until a few years ago, the legislation only mentioned pumped hydro and did not acknowledge any other forms of energy storage.

What role do energy storage systems play in Italy's decarbonisation & energy security?

Energy storage systems play a crucial role in Italy's decarbonisation and energy security. On 21 January 2020, the Ministry of Economic Development published the Integrated National Energy and Climate Plan, setting targets for energy efficiency, development of renewable sources, and CO2 emissions reduction.

Could Italy's grid-scale battery storage market see a massive expansion?

Grid-scale battery storage | Cameron Murray writes about the nascent market for large-scale battery storage in Italy, which could see a massive expansion in the short term. Italy's grid-scale energy storage market: a sleeping dragon Render of a co-located battery storage project in Italy from Innovo Group. Credit: Innovo Storage smart power

Can batteries be used for energy storage in Italy?

In Italy, batteries have become an attractive technology for electricity storage projects although they are not traditionally used.

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual ...

Of the 1100 GW of utility-scale solar waiting to interconnect to the grid at the end of 2023, 31 GW reached commercial operation during 2024, according to the Solar Energy Industries Association. And of the 1000 GW of battery storage awaiting interconnection at year-end 2023, about 15 GW were expected to begin

# Italian Energy Storage Project Grid Connection Regulations

serving grid needs in 2024, according to S& P ...

The Australian Energy Market Commission (AEMC) has published a final rule to speed up grid connections for new renewable energy generation and storage, following extensive industry collaboration and a rule change request by the Clean Energy Council (CEC).. The CEC said there were issues causing long delays and creating investment uncertainty, due to a lack ...

In 2024, Italy's energy storage market saw remarkable progress, with a 24.6% rise in the number of storage systems and a 30.4% increase in total rated power, reflecting the growth of larger, more efficient installations. To maintain grid ...

As a rule, electricity storage systems can be installed in photovoltaic systems already subsidized by the GSE without losing the subsidy, provided that they are correctly ...

Ancillary legislation adopted by the Italian Regulatory Authority for Electricity Gas and Water ("AEEG") provides the legal framework for storage solutions connected to the grid ...

The grid connection approval is usually an uncomplicated negotiation with the local grid operator, which leads to a bilateral agreement between the project developer and the grid ...

As a result there are a number of legal issues to consider, although the relative importance of such issues will be informed by the specific energy storage project design. Grid Connection: consideration will need to be given to the grid ...

Storage in Italy: Terna o Around Euro 200 mln invested (Regulatory Asset Base -RAB) o Storage pilot projects - Terna spa 9 o Main target: contribution to grid security o Size [MW]: 16 MW (phase I) o Solutions: Li-Ion, Zebra, Flow, other (supercapacitors, etc.) o Number of sites: 2 Testing, comparison, evaluation of different ...

The panel discussion on Day 1 of the Energy Storage Summit EU in London last week. Image: Solar Media. Italy's grid-scale energy storage market opportunities are unlike anywhere else, but many challenges and uncertainties around the different revenue streams remain, including the upcoming MACSE capacity market auction.

During the event, representatives of the Italian high-voltage grid operator, Terna, and of the low and middle-voltage network, Enel Distribuzione, revealed that the two companies have accepted to ...

Italy faces a critical obstacle in expanding Battery Energy Storage Systems (BESS): the virtual saturation of the high-voltage grid. This issue threatens to delay key projects, even as the country aims to reach 122 GWh of storage capacity by 2030, according to Simone Prato, Country Lead - Italy at Enertis Applus+.

Italy had 650,007 grid-connected energy storage systems at the end of June 2024, according to Italian PV association Italia Solare, with a total of 4.5 GW of rated power. "During the first half ...

grid presented over EUR21 billion in investments, +17% compared to the previous ten-year plan, to accelerate the ecological transition and guarantee Italy's energy security innovative hypergrid project unveiled: EUR11 billion for five new electricity backbones that will double the exchange capacity from the south to the north

Matteo Coriglioni, head of Aurora Energy Research Italy, said official data showed that as of the end of March, Italy had approved more than 2GW of energy storage projects, with another 8GW in the approval process. Aurora Energy Research has a very broad pipeline of energy storage capacity, which is four times what has been approved.

The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets,

Are you looking for information on energy storage regulation in Italy? This CMS Expert Guide provides you with everything you need to know. ... provides the legal framework for storage solutions connected to the grid by non-regulated subjects, like energy producers or end-users. 4. Please give examples of challenges facing energy storage ...

Storage facilities will play a key role in future scenarios characterised by an increasing deployment of renewable energy sources (RES). They will provide a number of ...

of the pipeline of connecting projects, which currently have a connection date after 2026, will be able to connect between 2 and 10 years earlier. We will also be enabling energy storage projects to connect to the grid more quickly, speeding up the connections for up to 117GW of energy storage projects in the pipeline.

UL's grid code compliance services can test to the applicable code requirements to help you demonstrate that your renewable energy technology can safely transmit power to the grid. Access grid code compliance ...

Figures by industry group Italia Solare put the current size of the Italian energy storage sector at approximately 450MW of total installed capacity. ... He added that there is real concern for storage project approval timelines to enable sufficient deployment and allow for the integration of Terna's renewable capacity goals, adding however ...

Analyses conducted by the National Manager of the Grid - Terna show that, by 2030, it will be necessary to develop in Italy about 71 GWh of utility-scale storage capacity, in ...

The grid-scale Italian energy storage market has been kickstarted from two different directions. The first was

big wins for battery storage projects in ancillary service and ...

New Aurora Energy Research report details Italy's path to 72 GWh energy storage capacity by 2030. ROME, ITALY (AURORA ENERGY RESEARCH)--A new report published by Aurora Energy Research, the global provider of energy market analysis, examines the auction system of the Italian Energy Storage Capacity Procurement Mechanism (MACSE).This ...

A render of a battery storage project from Innovo Group, which has teamed up with Iberdrola to deploy large-scale solar, wind and storage in Italy. Image: Innovo Group. The grid-scale energy storage market in Italy is set to become one of the most active in Europe in the next few years having been close to non-existent until now.

The MACSE auction will provide 15-year contracts for energy storage projects whereby they will be paid annual premiums to cover operating costs in exchange for making their capacity available on the Dispatching ...
