A linear power supply with a DC output is a type of power supply that converts AC (alternating current) from the wall outlet into clean and stable DC (direct current) power. This type of power supply is often preferred for sensitive electronics like audio equipment because it provides a low-noise power source.

The outdoor power supply is not just a "large power bank", it is more suitable to be called "portable energy storage". At present, the outdoor power supply of 1000Wh is not enough to supply power for various mobile phones, digital products, electrical products, mobile refrigerators, rice cookers, and other home appliances.
