

Lithium battery pack label

What are lithium battery labels?

Lithium battery labels are like treasure maps. They provide a wealth of information that's crucial for identifying the battery, ensuring safety, and complying with various regulations. Here's a breakdown of what you'll typically find on these labels:

- Product Information:** Basic details about the battery.

Why do you need a lithium battery packaging label?

This can include symbols indicating that the package contains lithium batteries and should be handled accordingly. Proper packaging is crucial to prevent damage and ensure safe transport. These labels are essential for safe transportation. They help prevent accidents and ensure that the batteries reach their destination safely.

Do I need a warning/hazard label for lithium batteries?

With the recent changes in Lithium Battery shipping regulations, these Caution/Hazard labels are required on all packages carrying Lithium Ion or Lithium Metal Batteries. These labels are designed in accordance with International air regulations. When it comes to regulatory compliance, we think through all of the details so you don't have to worry.

Do I need to include contact information on a lithium battery label?

These guidelines include using the IATA Lithium Batteries label and the obligation to add contact information. When the lithium threshold in your shipment is exceeded, it is crucial to include contact information on the label. This is a requirement that enables quick contact with the responsible party in case of an accident, fire, or emergency.

What is a lithium battery handling label?

Here's a table summarizing the main differences between these labels:

Label Type	Definition	Key Features
Handling Label	The handling label, often marked with messages like "Lithium Battery--Handle with Care,"	Indicates the package requires careful handling. It may also include warnings about potential flammability hazard if damaged.
Product Information Label	Basic details about the battery.	Provides essential information for identification, safety, and regulatory compliance.
Caution/Hazard Label	Indicates the presence of lithium batteries.	Designated for safe transportation and handling.
Contact Information Label	Includes contact details for the responsible party.	Enables quick communication in case of an accident, fire, or emergency.

How do you label a lithium ion battery?

Symbols: The label must include a symbol of a black battery group with one battery showing a flame.

UN Number: This indicates the type of battery and its associated risks. For example, "UN3480" for lithium-ion batteries shipped alone, and "UN3481" for lithium-ion batteries contained in or packed with equipment.
