What is a 48 volt DC inverter?

Built with a 48 volt DC input, this inverter performs with very little power loss. Users receive a notable increase in efficiency in large systems when compared to using inverters that accept 12 or 24 volts. This can be an attractive feature for sustainability lovers looking to live as efficiently as possible.

Are genetry solar inverters white-labeled?

Genetry Solar inverters are completely designed in-house by Genetry Solar in the U.S.A.; they are not "white-labeled" (rebranded) products designed by a different company. This means that we are able to provide literally unparalleled technical support, not to mention providing features not found anywhere else in the low-frequency inverter market.
