

Nalian Solar Booster Pump Water Pump

What is a solar pump booster in the SQB series?

The solar pump booster in the SQB series is used for pumping water from wells and ponds, increasing water pipe pressure, garden irrigation, and automatic water supply systems. It features a simple construction, economical design, high durability, and reliability. Voltage: DC 24V, DC 48V, DC 72V. Power: 210W~750W. Max. head: 60m.

What is a solar water pump?

A: Agricultural irrigation: Solar water pumps are an integral part of agricultural irrigation systems. They use solar energy to pump water from deep wells, lakes or rivers and deliver it to farmland for irrigation. This irrigation method not only improves irrigation efficiency, but also reduces energy consumption and environmental pollution.

What is a solar water pumping inverter?

The photovoltaic pumping inverter is another key component in the solar water pumping system. Its main function is to convert the DC power generated by the photovoltaic array into AC power to drive the water pump.

What are the benefits of solar water pumps?

They can reduce households' dependence on the power grid and reduce energy costs. Commercial operations: In the commercial field, solar water pumps are widely used in the water supply and circulation systems of waterscape facilities such as swimming pools, fountains, and water parks.

Are solar water pump systems safe?

Solar water pump systems do not rely on power supply from the power grid, avoiding the problem of water supply interruption caused by power failure or power outage. At the same time, since there are no flammable and explosive substances in the system, it has higher safety.

How do solar water pumps work?

Surface pumps are located above ground and move water through pipes; submersible pumps are located underground, but solar panels are connected to the ground to move water from the well to the ground. Q: What is the working principle of solar water pumps?

Solar Booster Pump Solar Booster Pump is a device that uses solar energy to increase the pressure of fluid (typically water) in a piping system. They are designed to enhance the pressure of already flowing water, rather than lifting or extracting water from a source Contact us What Are Solar...

Enhance your irrigation system's efficiency with our premium selection of irrigation and booster pumps. Designed for optimal water flow and pressure, these pumps ensure consistent irrigation across your landscape,
