ABB is introducing nickel-zinc (NiZn) batteries to its range of power protection products for data centers, adding ZincFive as supply partner for its uninterruptible power supply (UPS) solutions. The addition of NiZn battery chemistry offers mission-critical data centers a resilient, efficient and sustainable energy storage alternative.

How a new generation of uninterruptible power supplies can improve sustainability One example of where design firms can help their clients in achieving their sustainability goals is when prescribing uninterruptible power supplies (UPS) - devices that help to protect, stabilize and maintain the power supply coming into the building.

GX Series uninterruptible power supply (UPS) systems offer advanced power protection for gaming devices such as desktop computers, gaming consoles, peripherals, routers, modems, and home theater electronics. They provide ...

Today the data center is served by four smaller (750 kVA) UPS modules configured as two x 2N systems. This new UPS configuration offers full redundancy (meaning that if one UPS system fails, a redundant UPS system can supply all of the power for critical loads) -- and the ability to add capacity as needs grow.

# New UPS Uninterruptible Power Supply

That's the idea behind a new generation of easy-to-deploy, cloud-connected uninterruptible power supply (UPS) units with proactive alerting capabilities. An uninterruptible power supply is essential to any IT installation. It regulates fluctuations in power from the grid to avoid damaging sensitive IT equipment or losing data, and switches to ...

Orion is a Line Interactive UPS with 5 Australian three pin socket outlets. Three of these are battery supported, uninterruptible power outlets. This allows for critical equipment like computers, monitors and modems to be protected from power outages as well as power spikes and surges.
