interface between home and school, and involves interactions and experiences across and within home and school systems (e.g., the relationship between a child's parent and teacher). The family-school interface is often used interchangeably with several other terms (e.g., family-school partnerships, parental in-

Another critical dimension explored in the literature is the choice of export channels and the efficiency of agricultural value chains. The work by Fernandez-Olmos and D'ez-Vial (2014) delves into the strategic decisions farmers face between direct and indirect exports, each with its advantages and challenges. Indirect exports require a smaller commitment of ...
