

# Niamey generator container

What are containerized generator / packaged container and enclosure options?

Containerized generator /Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets,balance of plant equipment,and switchgear.

Why should you choose a containerized generator enclosure?

One of the key advantages of our containerized generator enclosures is their mobility. They are designed to be easily transported using standard transportation methods,such as trucks or shipping containers. The modular design allows for quick assembly and disassembly,enabling hassle-free relocation whenever needed.

What is a self-contained generator enclosure?

It utilizes shipping containers or modular structures to create a self-contained environment for generators of various sizes. These enclosures are specifically engineered to provide flexibility,mobility,and durability while ensuring the safe and efficient operation of generator systems.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/without CHP in a 40ft container,making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform,you have the flexibility you need to meet a 100% load or even a smaller load.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package,we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble,convenient for maintenance and inspection.

What makes a good generator enclosure?

Our enclosures are thoughtfully designed to maximize efficiency and functionality. We incorporate features such as access doors,ventilation systems,soundproofing materials,and fire suppression systems to optimize performance and ensure the smooth operation of your generator.

ELCOS offers the possibility of installing power generators inside CONTAINERS Iso Range 20/20HC" - 30/30HC" - 40/40 HC" according to the customer"s requirements. All the CONTAINERS can be silenced up to 50 dB(A) @ 7m. On request, it is also possible to provide the RINA certification.

The newly installed battery containers maintain a capacity of 1.5MWh and assuage the embassy"s dependence on diesel fuel, allowing the facility to power the site primarily with a clean, renewable power supply.
