

North Africa Solar Off-Grid Inverter

What is an off-grid solar inverter?

An Off-Grid Solar Inverter converts the direct current (DC) from solar panels into alternating current (AC) for use in homes or businesses that are not connected to the electrical grid. It is designed to work independently, often in conjunction with battery storage, to provide a reliable power supply from solar energy.

What is an off-grid solar inverter in Gauteng?

Off-grid solar inverters in Gauteng are best suited for people who want to be completely off the Eskom grid and be self-efficient, or for people who do not have access to Eskom's electricity grid. A fully installed off-grid solar system in Gauteng can be pricey but, it can save a large amount of money in the long term.

Do you stock off-grid solar power inverters?

We stock a wide range of off-grid solar power inverters to complete your PV project. View our competitive prices online or contact Sustainable.co.za about your inverter requirements today.

Does a hybrid inverter work with an off-grid?

Today, we have Hybrid Inverters that have power blending capabilities, which means that should you not be producing enough solar power to support your usage, the Hybrid will pull the deficit from the Grid or your Solar Batteries. The Off-Grid does not do this.

What types of solar inverters are available in South Africa?

Our units are configurable to run as three phase inverters as well allowing 10000w three phase. We at Full Circle Solar, offer a wide range of Solar Inverters for sale in South Africa, as well as inverter installation options if required. Our inverter models include popular brands such as Voltronic, Infinisolar, Axpert, Sunsynk and much more.

What happened to off-grid inverters?

Over the years, some successful and non-successful Off-Grid inverters have entered the market and quickly disappeared. This is primarily due to the newer Hybrid Inverters.

Sales of off-grid solar energy kits in East Africa in the second half of 2023 surpassed 2.5 million units, and Kenya is the largest off-grid-solar market in the region, representing 74% of total sales. While this is a 14% increase compared to the first half of the year, it represents a 1% decrease compared to the same time in 2022.

Ethiopia, Kenya, and Rwanda shows that 3% of urban electricity access is off-grid and 49% of rural electricity access is off-grid.¹¹ Plans for expanded access to electricity in the region have relied on the addition of off-grid applications, such as solar lights, solar home systems, and mini-grids. Generally, it is
