

# Outdoor power boost charging

Why should you choose a solar boost portable charger?

Choosing the right portable charger is essential for any adventure. Solar Boost is built for power efficiency, providing energy independence while minimizing environmental impact. Designed with robust features, it's easy to see why so many outdoor enthusiasts prefer Solar Boost for charging needs.

Can solar boost charge any USB-compatible device?

Yes, Solar Boost can charge any USB-compatible device, including tablets, GPS units, cameras, and portable speakers. As long as the device uses a USB connection, it can be powered by Solar Boost. Solar Boost stands out as an innovative and power-efficient solution for outdoor charging.

How do I charge the mophie power boost XXL?

To charge the mophie power boost XXL, connect the included micro-USB cable and plug it into an optional USB charger or available USB port on a desktop or laptop computer. Charging the power boost enables the built-in high-density batteries to hold their charge for an extended period, ensuring they have as much power as possible when you're ready to use it.

What is a boost charge wireless charging pad?

The Boost Charge Wireless Charging Pad 10W has been engineered to charge Apple and Samsung smartphones at the fastest possible wireless charging speed while delivering 5-watts to all other Qi-enabled devices. Charge without removing your case. Our Boost Charge Wireless Charging Pads are engineered to work with lightweight plastic cases up to 3mm.

Can solar boost be powered by a USB connection?

As long as the device uses a USB connection, it can be powered by Solar Boost. Solar Boost stands out as an innovative and power-efficient solution for outdoor charging. From its high-capacity battery to its rugged design, Solar Boost is a versatile companion for any adventure.

How do I use solar boost?

Ensure Solar Boost is placed in direct sunlight, either by attaching it to your backpack while hiking or laying it flat in a sunny location. Optimal sun exposure will accelerate the charging process. For maximum power efficiency, charge devices directly from Solar Boost during daylight.
