Does gas affect electricity prices in Ireland?

As gas is the largest and the marginal fuel input to electricity generation in Ireland, the price of gas directly affects the price of electricity. However, the full volatility of international commodity gas prices is not reflected in domestic prices because infrastructure costs and levies remain the same, irrespective.

Why are electricity costs so high in Ireland?

Our network costs are similar to those of other Member States. The relatively high price of our electricity in Ireland is attributed to our dependence on imported fossil fuels, particularly gas, and the costs of generation and supply, although transmission and distribution costs have increased year on year with greater investment.

What is Ireland doing about energy cost competitiveness?

Ireland has committed to developing metrics of energy cost competitiveness as outlined in the Government's White Paper on Ireland's Transition to a Low Carbon Energy Future 2015-2030. We have developed average electricity and natural gas prices for business and households. These are based on the EU Electricity and Gas Price Regulation statistics.
