

Outdoor power supply 1 kWh cheap recommendation

Should you buy a portable power station?

Over the past few years, as people have turned away from gas-guzzling generators, portable power stations have enjoyed a meteoric rise. Whether you're camping for the weekend, living off-grid, or protecting against power outages, these big batteries can help. You can buy tons of power stations with varying portability and capacity.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

Do you need more than one power station?

The reality is that if you're going to need to plug in more laptops or phones into a power station than there are ports for, odds are you are going to need more than one power station (or a single unit that is outside the scope of "portable").
