Solar Inverter Price in India. A solar inverter is a type of electrical converter which converts the DC (direct current) into a utility frequency AC (alternating current) that can be fed into a main grid in on-grid solar system. And vice versa in off grid solar system and hybrid solar system is very important part of a solar system.

If surplus current is to be fed into the utility grid, a grid-tie solar inverter is needed. If no grid feed-in is planned, an off-grid PV inverter for stand-alone mode is the right choice. Next, the efficiency of the models under consideration is compared. The more efficient the PV inverter, the higher the energy yield and the lower the losses.
