

Photovoltaic module export restrictions

What are China's new export restrictions on thin-film solar?

China has announced new export restrictions on materials essential for the thin-film solar industry, including critical minerals such as tungsten, tellurium, and indium. China's Ministry of Commerce and General Administration of Customs has imposed export controls on tungsten, tellurium, bismuth, molybdenum, and indium.

How will China's CdTe export curbs affect First Solar?

China dominates global tellurium refining and CdTe production, meaning the export curbs could tighten supply and raise prices. US-based First Solar, the world's largest producer of CdTe thin-film PV modules, could be particularly affected.

Will solar tariffs harm us solar producers?

Critics of the effort, including the Solar Energy Industries Association (SEIA) trade group, have said tariffs would harm U.S. solar producers because they would raise prices on the imported cells that are assembled into panels by American factories.

Can I reuse pv magazine content?

If you want to cooperate with us and would like to reuse some of our content, please contact: editors@pv-magazine.com. Since 2014, Vincent Shaw has been reporting on the Chinese solar market for pv magazine. Based in Shanghai, he covers the latest market developments, company news, and industry trends in Greater China.

According to data from the China Photovoltaic Industry Association, the proportion of China's PV module exports to India was just 6.4 percent of its total exports in 2022. In addition to the PV ...

Clean Energy Associates released a summary of the seven solar module trade policies and solar panel import tariffs currently in place, including AD/CVD rulings, Section 201/302, and the Uyghur ...

Current Status of Russia's Uranium Export Restrictions. Russia's uranium export restrictions are a response to the "Ban on Russian Uranium Imports Act" passed by the U.S. in 2024. This law prohibits the import of uranium from Russia between 2024 and 2027, with some exemptions allowing the import of limited quantities of low-enriched ...

If Chinese exports are restricted, First Solar will have to turn to other sources such as Peru and Canada, but given the limited global tellurium reserves (about 24,000 tons), there is a high risk of prices spiking in the short ...

Photovoltaic module import shipments by country, 2024 Imports at the national level are published in Table 6.

Photovoltaic module export restrictions

Country of origin is not published to protect individual company data. December 2024 . U.S. Energy Information Administration | 2024 Monthly Solar Photovoltaic Module Shipments Report 10 .

The U.S. slaps even more tariffs on Southeast Asia, as solar panels get antidumping duties that go as high as 3,521%

Subsequently, from FY 2022-23, the Solar PV Cells and Solar PV Modules (other than those exclusively used with ITA-1 items) are put under HS Codes 85414200 and 85414300 respectively. The details of solar cells and modules exported from the country for the last five years, country-wise, as per the website pertaining to Export-Import Data Bank of ...

However, China's export restrictions on cadmium telluride may offset this protective effect and even force First Solar to compete directly with Chinese companies for raw material procurement. ... China's PV Module ...

Recent bilateral agreements between major solar manufacturing nations, such as China and ASEAN countries, have introduced specialized provisions for photovoltaic ...

The solar PV module supply chain is predominantly led by China, which accounts for over 80% of the manufacturing capacity across polysilicon, wafer, cell, and modules. ... Exports grew by over 364% in FY2023 compared to FY2022 and increased by 748% in the first five months of FY2024 compared to the same period in the previous year. This was ...

Coalition trade lawyer says the U.S. Department of Commerce's final tariffs on solar cells and modules from Cambodia, Malaysia, Thailand and Vietnam are among the ...

However, Chinese companies have continuously circumvented these restrictions through capacity transfers to Southeast Asia. In 2024, the four Southeast Asian countries accounted for more than 80% of U.S. imports of ...

In the early 2010s Europe throttled the arrival of Chinese solar modules after struggling EU producers successfully lobbied for import restrictions. Deployment of solar arrays soon fell; consumers ...

Optimal building integrated photovoltaic sizing approach according to load profile under zero export restrictions with real data validation. ... The PV modules are positioned in an east-west orientation with an inclination angle of 10 degrees, resulting in a peak PV power generation of approximately 260 kW. ...

The United States' latest move to raise tariffs on upstream polysilicon and wafers from China is expected to have only a limited impact on China's solar power sector, said analysts and companies.

Panels imported under this "bridge" must be installed within 180 days to prevent stockpiling and U.S.

Photovoltaic module export restrictions

Customs and Border Protection has said it will vigorously enforce this provision, including by requiring importers to provide a certification of solar module utilization with detailed information about the modules being deployed. Import surges.

Indian solar exports have been growing in the past two years, following the US restrictions against China. India's solar exports rose 227% to \$1.8 billion in 2023 from \$561 million in 2022. The US accounted for over 97% ...

From pv magazine Global. The U.S. government decided to raise the tariff rates it applies to solar cells imported from China from 25% to 50%. "The tariff increase will protect against China's policy-driven overcapacity that depresses prices and inhibits the development of solar capacity outside of China," the White House said in a statement.

From pv magazine USA. The Biden administration has imposed a series of tariffs on hardware imported from China. In the case of the solar module business, these measures serve more as a warning ...

From July 2024 to June 2025, the Brazilian government implemented a new round of duty-free import quota restrictions, reducing the duty-free amount to USD \$1.01 billion. From July to September 2024, Brazil's cumulative import of photovoltaic components amounted to approximately USD \$535 million, which accounted for 53% of the duty-free import ...

In FY 2021-22, the HS Code 85414011 was retained for Solar PV Cells and new HS Code 85414012 was brought in for Solar PV Modules. Subsequently, from FY 2022-23, the Solar PV Cells and Solar PV Modules (other than those exclusively used with ITA-1 items) are put under HS Codes 85414200 and 85414300 respectively. ... Imposition of Basic Customs ...

The "import restrictions" on solar PV cells. Subject: Economy. Section: External Sector. Context: The Ministry of New and Renewable Energy (MNRE) on March 29, ordered to re-implement its 2021 notification of an "Approved List of Models and Manufacturers of Solar Photovoltaic [PV] Modules", also called the ALMM list.; What is the ALMM list? Why is it being ...

For this reason, the Turkish Ministry of Economic Affairs has strictly limited the import of PV modules from abroad since June 2016. An import or reimbursement of the very high VAT burden on import modules can take up to 14 years. ... Are all foreign manufacturers affected by import restrictions for modules? Yes, this is true for all. However ...

In fact, solar PV modules have witnessed a drastic ramp up in manufacturing capabilities over the past few months. According to a report by ICRA, India exported US\$ 1.03 billion worth of solar cells and PV modules in 2023. ... which accounted for around 97% of exports and has put restrictions on module imports from China. A report by IEEFA ...

Photovoltaic module export restrictions

(Reuters) -U.S. trade officials finalized steep tariff levels on most solar cells from Southeast Asia, a key step toward wrapping up a year-old trade case in which American manufacturers accused ...

China recorded new highs in output value and the export of photovoltaic (PV) products in 2022, with Europe remaining the most important export market, accounting for more than 50 percent of total ...

China has announced new export restrictions on materials essential for the thin-film solar industry, including critical minerals such as tungsten, tellurium, and indium.
