What is a 25,000 mAh power bank?

25,000mAh for Long-Haul Power: Set off on extended journeys with a huge 25,000mAh capacity that supports your devices through multiple uses, complete with 100W ultra-fast recharging that fuels the power bank to 30% in just 20 minutes.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running on empty.

Which USB port does a power bank use?

Power banks with USB-A ports are the slowest, while USB-C ports are the fastest. Most small electronic devices use three standard ports: USB-A, USB-C, and micro-USB. Micro-USBs are slow and are being phased out. USB-A is the most common input and output port on portable power bank chargers.

What is a USB-C power bank?

USB-C ports are the most efficient and are becoming more common. Power banks with multiple ports let you charge many devices at once. Some power banks, like the Nitecore NB10000, have "pass-through charging," which lets you use the power bank to charge a device while the power bank is charged through a wall outlet.
