The ALPTE20Q ATOM Lithium-powered electric pallet truck, a revolutionary solution that embraces the current industrial trend of lightweight applications and Lithium power technology. This innovative design builds upon the renowned ...

The weight is given by Volvo Trucks [6] as around 500kg (reference 7 gives the mass as 505kg) and the packs uses up to 4500 cells. Considering that we know this pack uses Samsung 21700 cells [1] and that they have a maximum energy of 18Wh that would give a total capacity of $18\text{Wh} \times 4500 = 81\text{kWh}$.

More warehouses storing more battery-powered products brings more risk. And alongside the products being stored, there is a range of rechargeable battery-powered hazards in running the warehouse itself. These include: Rugged tablets, barcode scanners and other operational hand-held devices; Automated vehicles that self-park at charging stations
