central europe sao tome sodium ion energy storage. Moreover, the ASA-V 2 C electrode enabled us to demonstrate a dual-ion energy storage device by coupling it with the FSI --intercalation graphite cathode, showing a maximum energy density of 175 Wh kg⁻¹ and supercapacitor-comparable power density of 6.5 kW kg⁻¹.

There are hybrid types of supercapacitors that contain elements of a lithium-ion cell together with a supercapacitor. These have a higher energy density than an ordinary supercapacitor but still far from that of a pure lithium-ion cell by a factor greater than 10.
