

Selling outdoor power supplies across borders

Can subregional electricity markets connect power systems across borders?

Figure 1 presents three proposed subregional electricity markets in Southeast Asia that could connect power systems across borders. In this case, effectively designed markets would support increased integration of renewables, energy security, and grid reliability and resilience in the Association of Southeast Asian Nations (ASEAN) region.

What is cross-border power trade?

Depending on the form, cross-border power trade can involve different degrees of coordination between system operators and utilities. A fully integrated wholesale market, for example, might cover a number of interconnected countries served by a single system operator.

How can we support cross-border power trade in South Asia?

Box 2 presents a collaborative approach to supporting cross-border power trade in South Asia. The power systems of countries can be interconnected in different ways, primarily synchronously or asynchronously (with the link use of power electronics).

Why do we need a regulatory framework for cross-border electricity trade?

A regulatory framework is necessary to ensure all types of cross-border electricity trade between two or more countries are clearly defined, framed, and protected. Europe has experienced an increase in cross-border electricity transmission capacity and flows over the past few decades, partly due to the European internal energy market.

Can a utility sell services to a neighboring country?

Alternatively, a utility in one country may sell services to a utility in a neighboring country through a series of bilateral contracts. A country may also host a tenant generator that connects directly to a utility in a neighboring country.

Can cross-border power trade support resilience?

Cross-border power trade can support goals such as improved grid resilience, increased energy access, reaching renewable energy targets, and increasing economic development. This fact sheet explains how cross-border trade can be a potential technical solution to support resilience.
