For the Li Batteries, you only need to look at the data sheet for the battery, and to make sure that you set the max charging voltage to slightly less than the max allowed. Also make sure the minimum has a small offset added so the inverter cuts off before the battery reaches minimum. (about 100mV should do).

With V-Guard inverters, you can choose the power capacity and functions that best fit your needs. Whether you're looking for a basic inverter or a more advanced one with smart features, we have a range of options. Upgrade to V-Guard Inverters & Batteries and experience the peace of mind that comes with reliable and uninterrupted power.
