

# Uninterruptible power supply supplier in Democratic Republic of Congo

What is the supply voltage in Democratic Republic of Congo?

In Democratic Republic of Congo the supply voltage is 220V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 220V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

What percentage of Congolese people have access to electricity?

Less than 10% of the Congolese population has access to electricity, 35% in urban areas (50% in Kinshasa) and less than 1% in rural areas. There are also strong regional disparities in access to electricity. But, Congo has an immense development potential thanks to abundant hydrological and solar resources.

What is the hydroelectric potential of DRC?

The DRC is essentially comprised of significant hydroelectric resources estimated at over 100,000 MW. About 44% (44,000 MW) of the total hydroelectric potential of DRC is concentrated at the site of
