A portable power supply is very much like a generator. They provide you with electrical power when you are camping or if the power is out in your home. There are a few differences, however, between a portable power supply and a generator. First of all, a generator runs on gasoline, while a portable power supply runs off of a rechargeable battery.

Portable energy storage power supply is a kind of information security, portable, stable and environmentally friendly small energy storage system, the use of built-in high energy density lithium-ion battery to provide a stable AC and DC output power management system, with electricity is usually 0.2-2kWh, while the development has a greater ...
